

An introductory session will be organised on the **Green Internship Program** offered on National Internship Portal by **1M1B Green Skills Academy** in collaboration with **Salesforce**. This program is designed to engage 10,000 students across the country in transforming their campuses into becoming more sustainable through hands-on projects.

This internship opportunity is open to students from all fields, and they will have the chance to develop valuable skills in sustainability that align with the **National Institutional Ranking Framework (NIRF)**'s focus on sustainable practices in the educational campus.

Up Session Focus:

Faculty members nominated as supervisors will play a key role in guiding interns in implementing the Sustainable Campus Framework and Assessment Tool and integrating data analytics into campus sustainability projects.

By working closely with students, faculty supervisors will help them build expertise in sustainability, which is projected to be a significant sector for future jobs.

Join the Session:

Date and Time: November 19, 2024, 11:00 AM – 11:45 AM Or November 20, 2024, 3:30 PM – 04:15 PM

Link to pre-register: <https://forms.gle/yQKmX2LRgPzypJFeA>

Direct Link to Join the session: <bit.ly/Greeninternship>

Session Agenda:

- Overview of the Green Internship Program
- Role of faculty as mentors and supervisors
- Faculty's internship toolkit
- Q&A session for faculty and administrators

We encourage you to join this session and circulate this invitation to faculty members who would be enthusiastic about contributing to this initiative. Your participation will be invaluable in helping students prepare for emerging roles in sustainability and environmental stewardship. Thank you for your continued commitment to education and sustainability.
